

FINNISH SISU- SMOKE SAUNA STOVES

SISUSAVUSAUNA

SISU-smoke sauna stoves are handmade in Finland. Our selection of stoves include different sizes, natural stone built smoke sauna stoves and single heated sauna stoves with chimney. We also manufacture smoke sauna stoves following clients' wishes, with a variety of optional extras. Genuine SISU- smoke sauna stoves are built from quality Finnish soapstone and fire bricks, assembled with our unique design. SISU- smoke sauna stoves are delivered as an installation package with assembly directions. Assembly can be arranged upon request.

NEW, MORE EFFICIENT STOVE SELECTION

The SISU- smoke sauna stove has proven its efficiency and durability with years of stove manufacturing experience. The stove design that we have created combines the heat qualities and tender feeling of *löyly* of traditional smoke sauna stove to modern structure and fire safety. In development of SISU- smoke saunas we have paid extra attention to the even burning of the firewood in the stove, creating a lasting, optimal smoke sauna experience. In SISU- smoke sauna you will gain the most enjoyable bathing experience without suffering from the feeling of bitterness of the air.

As optional extras, you can get a SISU-stove lid for your sauna to add to the ease of use. When you close the lid after bathing, the heat stays in sauna for a long time, even to the next day. We also manufacture stove top water boilers which heat the water when sauna is warming, to be used for washing up after sauna. For special order, we manufacture our stoves with natural stone exteriors and covers.

SISU- SINGLE WARMING STOVE

The latest addition to our Finnish stove selection is one which produces a smooth sauna experience and quality of smoke sauna, with chimney. The stove warms like a smoke sauna stove with wood, but the smoke floats between the stones within the furnace before it exits out through the chimney. This single heated SISU- stove is made out of the same Finnish soapstone as our other stoves and has a fire brick furnace as its' heart. Once the hundreds of kilos of the sauna stove stones warm up, the stove will keep the warmth within for hours and hours, with remarkable extended heat storage.

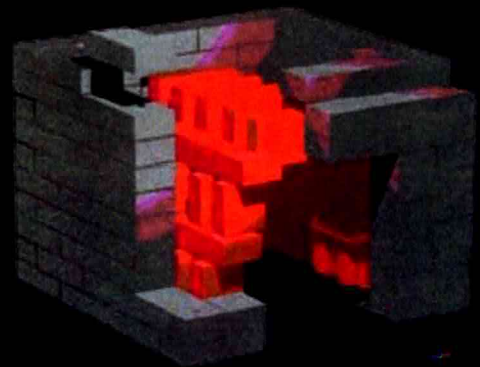

SIZES OF SISU-SMOKE SAUNA STOVES

SISU- smoke sauna stove sauna volume between 15-25 m³
